NEURALEARN · AI VISUAL TUTOR · BY NETHAN

Every student deserves a professor who can draw.

The all-in-one AI platform where **any topic — even your own textbook PDF** becomes an animated board lesson. **Explained in words first. Then drawn live.**

📝 **Ask anything**
topic, level, or your PDF

→

✍️ **Full answer first**
text before anything

→

🎬 **Watch it drawn**
live · narrated · line by line

UNDERSTAND IT · DON'T JUST MEMORIZE IT

THE PROBLEM

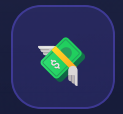

200 words of text is not understanding.

Students don't lack content — they lack **someone who draws it for them**. Reading forgets. Coaching excludes. Chatbots dump.

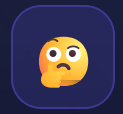

Memorize → forget → repeat

Passive reading and dense notes **evaporate before the exam**. No "aha" moment, no recall hook — just rereading the same page three times.

Good help costs money

Premium coaching and personal tutors go to the few who can pay. **Doubt-clearing suffers for everyone else.**

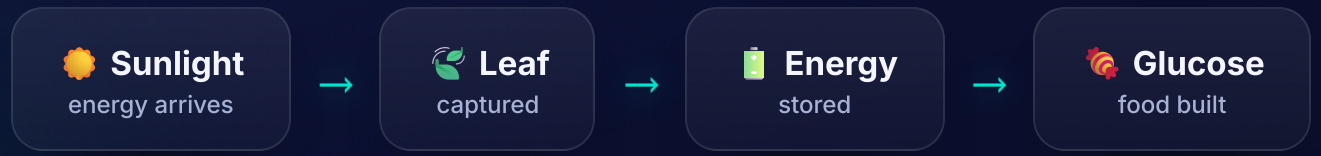

Text AI ≠ a teacher

Ask a chatbot anything — **a wall of text**. No diagram, no motion, no sync between saying and showing. Nothing sticks.

THE INSIGHT

A great professor doesn't just talk. He draws while explaining.

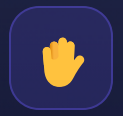

See it **move**, hear it, and read it — all at once. That's how the brain actually learns.

This exact strip is what NeuraLearn builds as a live, narrated diagram.

THE SOLUTION

Ask once. Read the answer. Then watch it drawn.

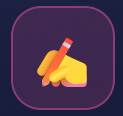

Three steps, every single time. **The text always arrives first** — that's our UX promise.

1

You ask

"Explain packet switching" — or **attach your own syllabus PDF**. Level-aware: undergrad fundamentals up to rigor.

2

Text first

A complete, structured explanation appears **before anything else** — clean markdown worth saving and studying.

3

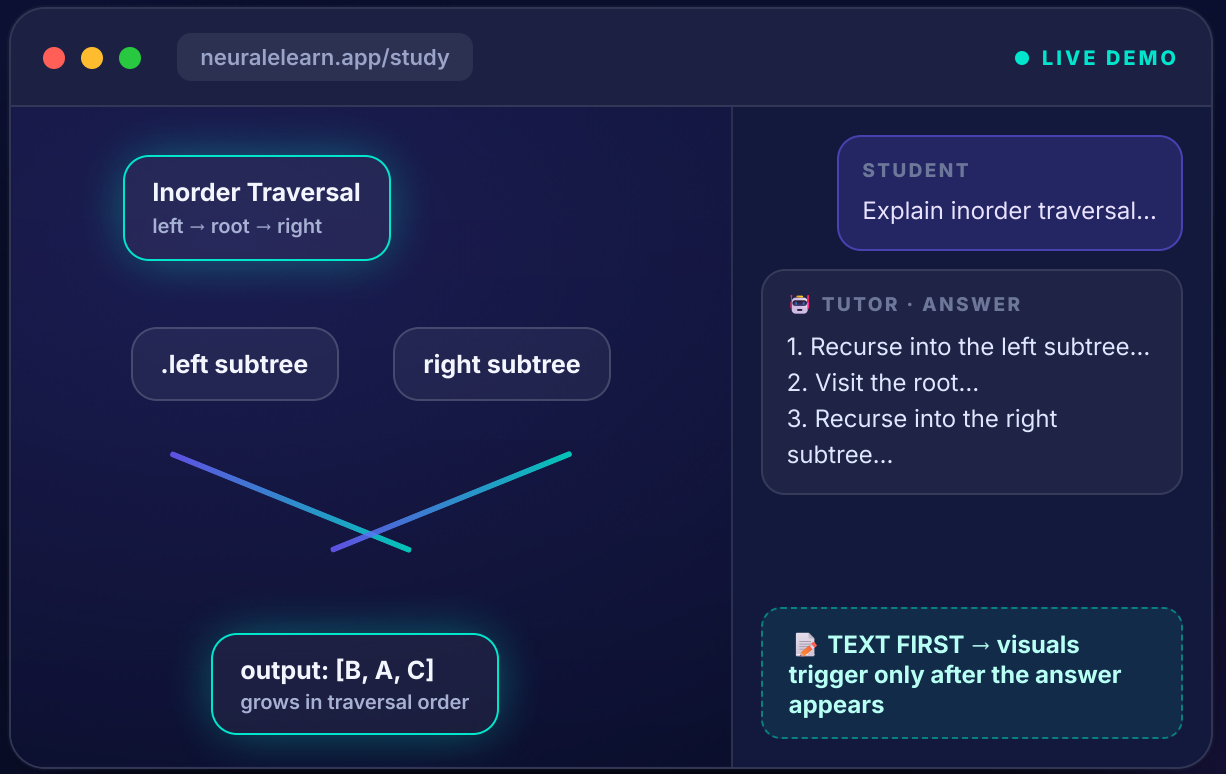

Then the visual

The AI programs a **live animation** — nodes, packets, equations moving — narrated like a video, synced with the text.

STORYBOARD · 1/3

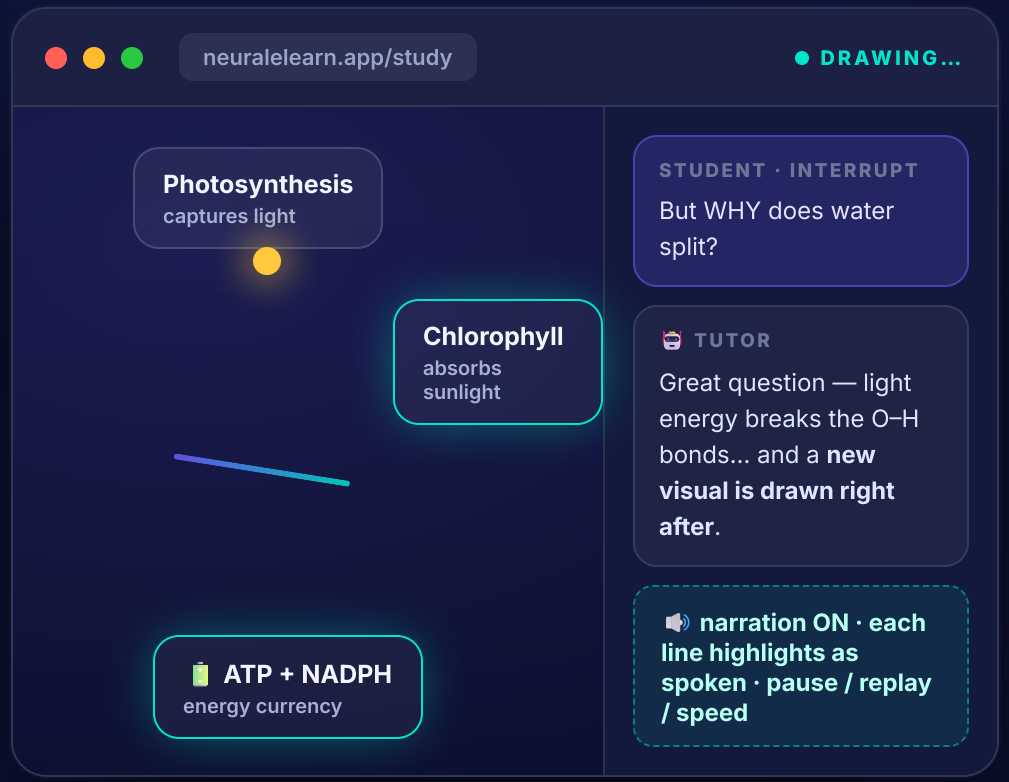

A student asks. A tutor answers — then draws.

- One ask-bar, zero learning curve — type a doubt or pick a sample.
- **Full text answer first** — sentences worth studying and saving.
- Level-aware: **fundamentals → rigor**, never a shallow stub.
- The board takes over: an animated lesson builds itself.

STORYBOARD · 2/3

The lesson draws itself. Doubts never wait.

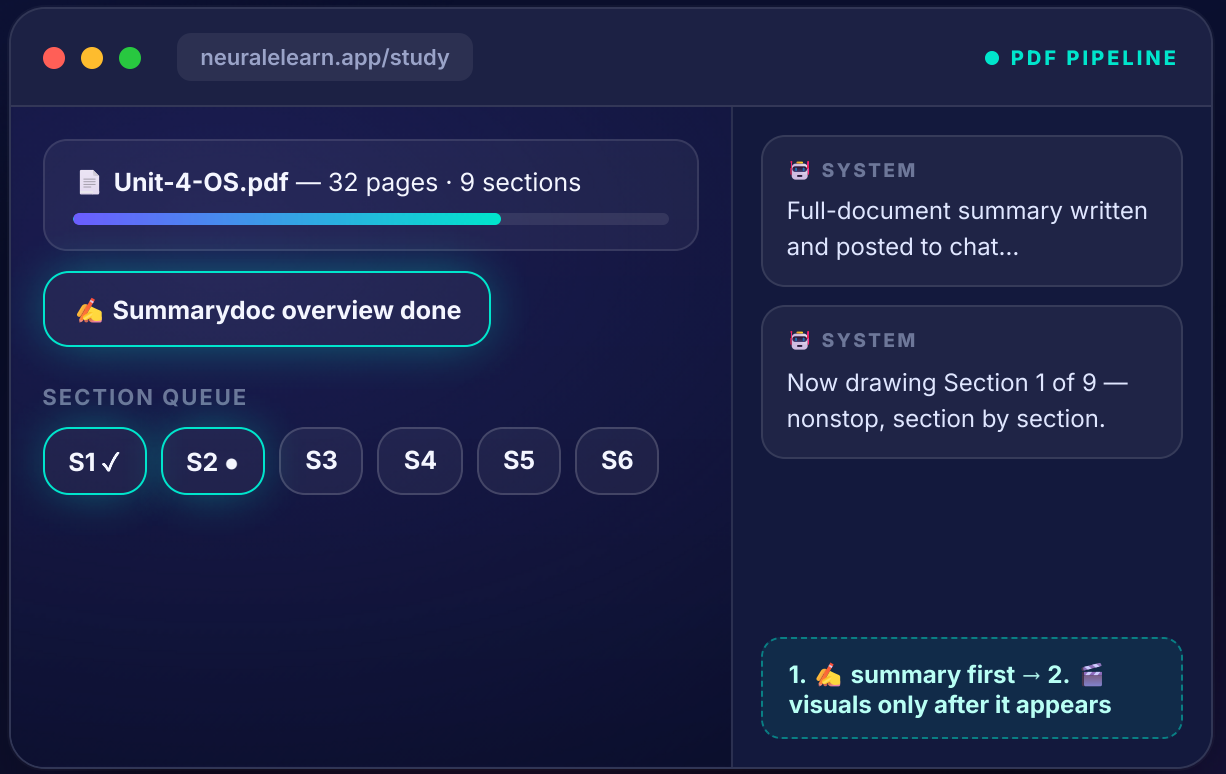

- **Every spoken sentence changes the picture** — reveal, move, transform. Never static slides.
- Narration synced line-by-line with the text on screen.
- Ask a doubt mid-lesson → **answered instantly**, follow-up visual drawn right after.
- Replay any line — purpose-built for exam revision.

STORYBOARD · 3/3

Learn from YOUR OWN book.

- Attach the **college / school PDF** — syllabus, notes, chapters.
- NeuraLearn reads it all and writes a **complete document summary** — shown first, always. (Our newest feature.)
- Then teaches **section by section** with live visuals, nonstop.
- Your book, your terms, your exam — **never generic content**.
- Built-in resilience: if the AI summary fails → **falls back to raw text, lessons run anyway**. A student is never stranded.

WHY STUDENTS NEED IT

What actually changes for a student

Understand, don't memorize

See it, hear it, read it — **three senses, one concept**. Every sentence matches a visual change, so memory hooks itself.

Hours → minutes

40 pages and 3 YouTube videos condensed into **one properly made animated lesson** — at your speed, in your language.

Doubts never wait

A tutor who never sleeps. Ask "why?" as many times as you want — **no judgement, no ₹500/hour**.

Your syllabus, your pace

Strictly from your attached book. **Replay, slow down, jump** to any scene — built for revision night before exams.

WHERE NEURALEARN FITS

Nothing else does all of this.

OPTION	INSTANT?	LIVE DRAWING?	FROM YOUR BOOK?	ANSWERS DOUBTS?	TRUE COST / MONTH
💬 Text AI chatbots	✓	✕ wall of text	✕	~ generic	₹0 but passive
📺 Online videos	✕ search first	✓ pre-made	✕ not your syllabus	✕ can't ask	time + ads
🏫 Coaching / tutors	✕ schedule	~	~ sometimes	✓ limited time	₹3,000–₹10,000
NeuraLearn	✓	✓ live & unique	✓ PDF import	✓ 24 × 7	₹0 – ₹499

ChatGPT explains. YouTube shows. Coaching demands schedule & money.
NeuraLearn does all three — and draws it live from your own book.

ALL-IN-ONE PLATFORM + ROADMAP

One place for the entire learning loop

Learn any topic

Ask → read → watch the drawing. **Core engine, live today.**

Own-book lessons

PDF import with summary-first pipeline. **Live today.**

Doubt solver

Chat + instantly drawn follow-ups. **Live today.**

Classrooms

Teachers assign lessons from their PDF; students learn; teachers see **exactly who's stuck where**.

NOW — SHIPPED

Working demo

Engine + PDF flow + chat, running live end-to-end.

NEXT

Host & accounts

Deploy, cloud-saved lessons, saved history, usage meter.

THEN

Classrooms

Assignment builder, cohort analytics, stuck-beat heatmap.

VISION

Mastery map

Progress analytics, streaks, practice gen, custom voices.

BUSINESS MODEL

Tutor-level help. Student price.

Learner
₹0
forever free

- ✓ 25 lessons / month
- ✓ Whiteboard + voice
- ✓ Doubt chat

MOST POPULAR

College
₹499
per month

- ✓ Unlimited lessons
- ✓ PDF syllabus import
- ✓ Classrooms + assignments
- ✓ Progress analytics

Enterprise
Custom
institutions

- ✓ SSO + admin controls
- ✓ Private deployment
- ✓ LMS integration

Every student gets a ₹5,000/month tutor for **a movie-ticket price**.
Freemium funnel → word-of-mouth across colleges → classrooms drive retention.

IMPACT

One teacher per 100 students is impossible. One tutor per student just became possible.

🌍

Equal

The "best teacher" stops being a **privilege** of those who can pay for coaching.

IN

Local-first

Built for Indian syllabi & textbooks, student budgets (₹/UPI), **voice narration included**.

🚀

Generational

A generation that **understood** its subjects — not memorized it — will build a better tomorrow.

ChatGPT explains.
NeuraLearn draws it —
and a student remembers it.

📝 **Ask anything**
or attach your PDF

→

✍️ **Full answer first**
understand the "what"

→

🎬 **Watch it drawn**
live · narrated · line by line

It's a working demo — not just a deck. Ask me for the live link.

Understand it. Don't just memorize it. 🟪
